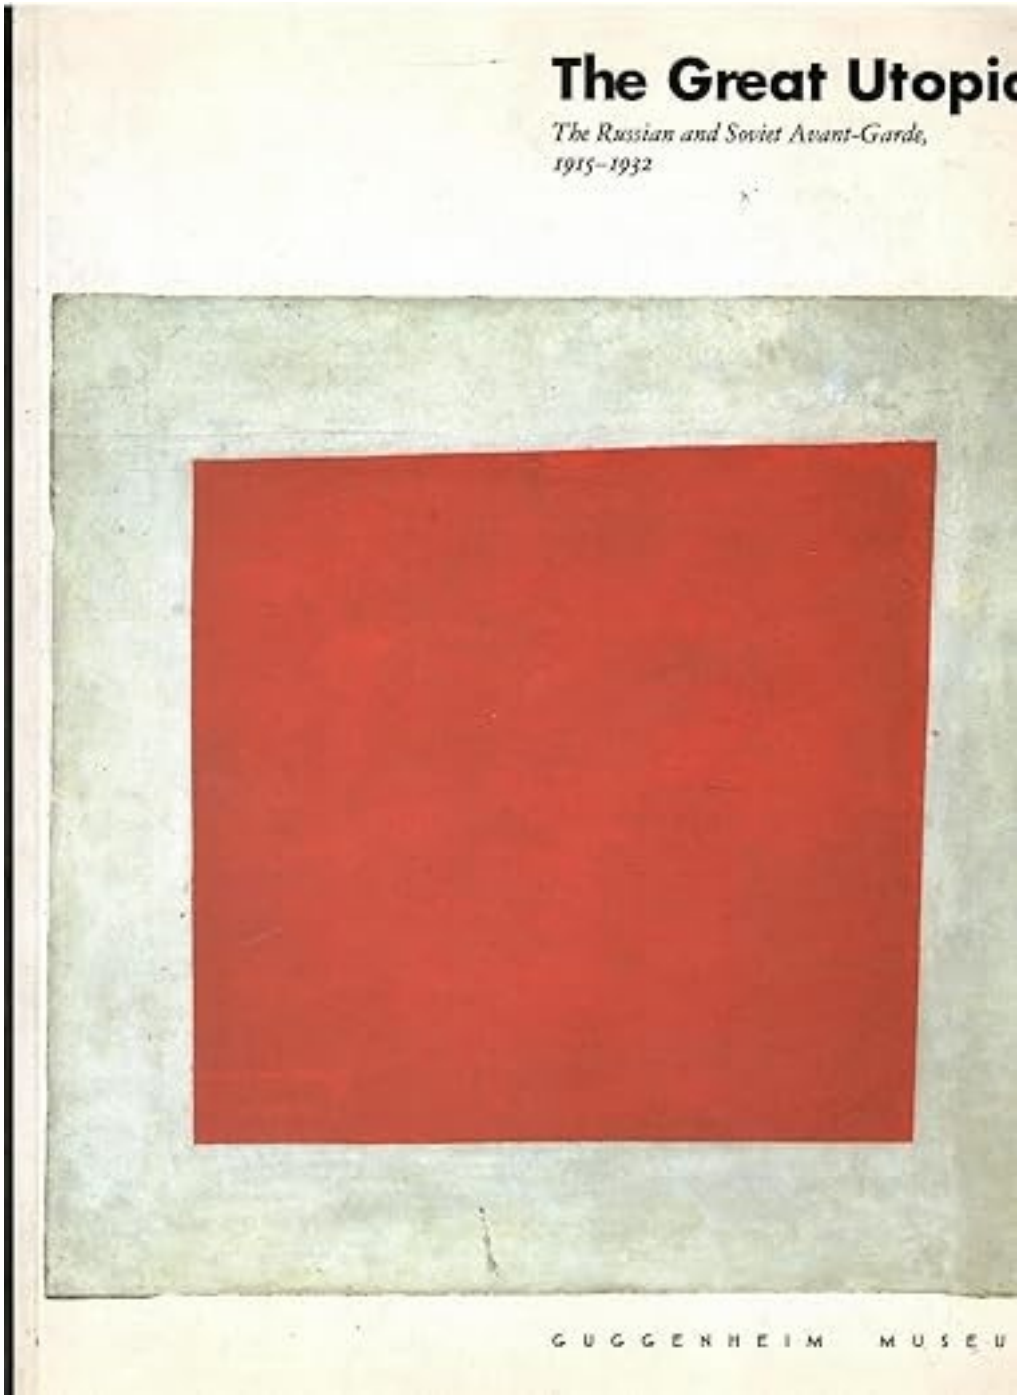
The Great Utopia (1921 – 1929)



By Gutenmerge Museum

I. Avant-Gardeism – what is it?

Avant-gardeism is in fact a belief in the eccentric art process for all living people. It means to mix art and life as images called projecciones which

then produce the artistic superstructure with all facts. I means for example in Soviet history – to produce artistic photographs which is acted out for a image of utopia.

## II. Soviet History

In fact Soviet history is an avant-garde utopianism – Vekhutimas, Narkomprods, Worker's Clubs and images like Malevich classes and such heights of experimental figurative Tatlin, Lessini and Mayakovski and such eccentric theories of art and living life.

## III. Art and Revolution

Praxis in Trotsky and Lenin inspired a whole artistic set-up – one idea was to live symphony and run around.
